Allowable Subject Matter

1. Claims 6-12 and 14 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 6 recites a method for replacing solvent evaporating from a microvolume of sample comprised of continuously replacing the solvent via a microchannel. The sample contains solvent and reactant which are to be reacted in an open microarea of a microfluidic device. **The solvent is miscible with the sample and the microvolume of solvent comprises the reactant.** Claim 8 adds the steps of providing a microfluidic device having the microarea and providing the sample to the microarea. The Examiner considers Litborn to be the closest prior art. Litborn teaches a method for replacing a covering liquid in a microarea. The covering liquid is used to cover a sample that is reacting, ***but the covering liquid of Litborn is immiscible with the sample in the microarea.***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
